- HTML/CSS
- Bootstrap
- JavaScript
- MySQL
- React.js
- UI/UX Design

## PROJECTS

### AlphaArray – Educational Web Application (PHP, MySQL, HTML, CSS, JavaScript, Bootstrap)

2024

AlphaArray is a PHP-based educational web application enabling learners, instructors, and institutions to connect in an interactive, scalable environment. Built features like user authentication, course management, and responsive design for cross-device access. Utilized MySQL for secure data handling and modern web technologies to optimize usability, accessibility, and system scalability.

### Jobify – Laravel-based Job Portal (Laravel, PHP, MySQL, Bootstrap, JavaScript)

2025

Jobify is a Laravel-based job portal designed to connect job seekers with employers in a secure, user-friendly environment. It includes features like user registration, job postings, application tracking, and role-based access for admins, recruiters, and candidates. Built with MySQL and responsive design to ensure smooth, accessible use across all devices.

### SafePassage – Android Security App (Kotlin, Android Studio, SQLite, Material Design)

2025 – Present

SafePassage is an Android app that helps users securely store and manage their credentials and documents. It includes PIN-based access, a password manager, credit card storage, a document vault, a password generator, and a password strength monitor. Designed with an easy-to-use interface and strong security to ensure a private, seamless experience.

## OTHER PROJECTS

### TextUtils – React-based Text Manipulation App (React, JavaScript, HTML, Bootstrap)

2025

TextUtils is a React app that manipulates text, offering formatting and other customizable transformation features.

### QuickyNews – React-based News App (React, JavaScript, HTML, Bootstrap)

2025

React application that fetches news from an API and displays category-wise updates with a clean, responsive, and user-friendly interface.
