

DISHANK PATEL

Frontend Developer (React.js)

+91 8401991007 • pateldishank19@gmail.com • github.com/19Dishank • dishankpatel.in • Surat, Gujarat

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building production-ready React applications. Skilled in component architecture, real-time data integration with Socket.IO, state management, and REST API consumption. Delivered features across complex multi-role dashboards and multi-tenant SaaS products in a professional team environment. Proficient in modern JavaScript, TypeScript, Tailwind CSS, and responsive UI design. Eager to contribute to a fast-moving frontend team.

EXPERIENCE

Frontend Developer Intern — Narola Infotech

Jan 2026 – Jul 2026

React.js · TypeScript · Tailwind CSS · JavaScript · REST APIs · Zustand · Redux Toolkit · Git | Surat, Gujarat

- Gained professional experience building and shipping React features end-to-end in a structured sprint environment — taking PM requirements through to production-ready UI across multiple real-world projects.
- Applied core frontend skills hands-on across projects: JWT auth flows with Axios interceptors, global state with Zustand and Redux Toolkit, form validation with React Hook Form + Zod/Yup, role-based access control, and real-time data with Socket.IO.
- Collaborated on a shared codebase using Git branching and code reviews, developing professional habits around clean, maintainable code in a team setting.

PROJECTS

DocCenter — Multi-Tenant Document Management SaaS

2026

React.js · Tailwind CSS · JavaScript · Socket.IO-client · Context API · Axios · shadcn/ui · Vite

Role: Frontend Developer | app.doccenter.in

- Engineered a subdomain-based multi-tenant SaaS where each tenant gets an isolated dynamic domain; built a dual-router setup that resolves tenant context from the URL and gates all UI access behind a fully dynamic role and permission system — admins create custom roles, assign granular permissions, and reassign users, with access gates updating in real time.
- Implemented S3 multipart upload from the frontend — splitting large files into parts, uploading each part directly to S3 via backend-generated presigned URLs, and retrying only failed parts on error; paired with a drag-and-drop file/folder UI supporting nested uploads, downloads, recycle bin, restore, and permanent deletion.
- Built real-time file collaboration using Socket.IO — uploads, deletes, restores, and renames instantly reflect across all active users in the same tenant without a page refresh.
- Handled JWT auth with silent access token refresh and request queuing during token rotation; implemented time-limited document share links with frontend expiry validation, and an API key management UI for SDK-based third-party integrations.
- Developed storage usage charts with live quota indicators, and wired a granular email notification system (uploads, role changes, limit alerts) with per-event toggles per user.

AWIP — Aviation Weather Intelligence Platform

2025 – 2026

React.js · Zustand · Socket.IO-client · Axios · React Hook Form · Zod · Tailwind CSS · React Router

Role: Frontend Developer | github.com/19Dishank/awip-frontend

- Real-time dashboard for pilots and flight dispatchers displaying live weather, NOTAMs, and flight data via Socket.IO feeds.
- Architected Zustand stores for auth, socket, weather, and flight state; implemented Axios interceptors with silent token refresh and request queuing.

- Built role-based UI (Admin / Dispatcher / Pilot) with protected routes, lazy loading, and a flight search feature across active routes.
- Designed fully responsive layouts with Tailwind CSS and integrated React Hot Toast for real-time event notifications.

CravingDash — Personal Food Delivery Platform

2025 – 2026

React.js · TypeScript · Tailwind CSS · Redux Toolkit · Axios · Git

Role: Frontend Developer | github.com/19Dishank/food-delivery

- Built a dedicated food delivery platform for a single restaurant — not a marketplace — where one restaurant manages its own orders, kitchen workflow, and assigns its own delivery riders.
- Developed the customer-facing panel: menu browsing, cart, checkout, and live order-tracking flows.
- Built the restaurant admin panel: order management, menu CRUD, rider assignment, and delivery status tracking.
- Managed frontend state with Redux Toolkit and consumed REST APIs for real-time order status updates across both panels.

Personal Portfolio Website

2025

React.js · CSS3 · JavaScript

dishankpatel.in

- Live portfolio showcasing projects, skills, and learning journey with smooth animations and mobile-first responsive design.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks / Libraries: React.js, Tailwind CSS, Bootstrap, shadcn/ui

State & Data: Zustand, Redux Toolkit, React Hook Form, Zod, Yup, Axios, Socket.IO-client, React Router DOM

Tools & Platforms: Git, GitHub, VS Code, Vite, npm

Concepts: REST APIs, Component Architecture, Multi-Tenant Architecture, Auth Flows (JWT / Refresh Tokens), Role-Based Access Control, Responsive Design, Real-Time UI

Currently Learning: Next.js

Exposure: PHP, Laravel, MySQL, Kotlin, Android Studio, Node.js

EDUCATION

Master of Computer Applications (MCA)

Aug 2024 – May 2026

Sarvajani University, Surat

Bachelor of Computer Applications (BCA)

Oct 2021 – Apr 2024

Veer Narmad South Gujarat University, Surat
